PERSONAL PROJECTS

Vehicle Accident Prevention System 🔗
- The aim of this Project is to develop a smart system that helps to prevent accidents caused by drowsy driving. Using the concept of **machine learning** and **image processing**. If the driver starts to fall asleep, the system will notice and sound an alarm to wake them up. Even if the driver somehow feels tired, the system will recognize that too, and alert them.

The Intellect | A News Web Application 🔗
- Developed a News application using **GNews API.** GNews API is a simple HTTP REST API for searching and retrieving live articles from all over the web.

TrustEdge Reality | A Real Estate Brokerage Firm 🔗
- Developed a real estate brokerage firm web application using **HTML, CSS and JavaScript**.
